

Devyansh Grover

Faridabad, India | devyansh.grover348@gmail.com | +91 8130340531 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Full Stack Developer with 6 months internship experience building MERN applications, REST APIs, and AI-integrated products. Strong in scalable frontend architecture, authentication systems, and performance optimization.

SKILLS

Frontend: HTML, CSS, TailwindCSS, JavaScript, TypeScript, React.js, Next.js

Backend: Node.js, Express.js, REST APIs

Database: MongoDB, SQL

Tools: Git, Redux Toolkit, Postman, Vercel, Netlify, Render, Framer

EXPERIENCE

Software Developer Intern

July 2024 – January 2025

[Founders Cart Private Limited](#)

- Developed a **CMS website builder** using the **MERN stack** with **drag-and-drop features**, enabling users to create fully customizable pages with pre-built components.
- Designed **reusable UI components** with grid-based layouts improving customization flexibility
- Built **REST APIs** for content storage, media uploads, and page rendering
- Optimized frontend performance using **lazy loading & state optimization**, reducing load time by **~30%**

PROJECTS

Mera.AI – Personalised AI Chat-bot

GitHub: [MereAI](#)

- Built a **multi-tenant AI chatbot** platform integrated with **Groq LLM API** for business-specific customer support, featuring **Firebase Authentication** for secure access and cross-session chat history.
- Architected a scalable multi-tenant infrastructure with **isolated, configurable chatbot instances** per business with **feedback error handling**, with planned extensibility for tenant-level analytics and Google Calendar integration.

MeraForms – Dynamic Form Builder

Live Link: [MereForms](#)

- Built a full-stack dynamic form builder with multi-section architecture, **conditional if-else branching engine**, and a management dashboard supporting full **CRUD operations** with **one-click publishing via shareable public URLs**.
- Engineered a decoupled **public-facing form renderer with zero-auth** submission via generated public endpoints and a **centralized response aggregation** panel for real-time submission tracking.

ColdCraft – AI-Powered Cold Email Personalize

Live Link: [ColdCraft](#)

- Built a MERN-based **AI cold email generator** integrating **Groq LLM API** to create personalized, role-specific outreach emails using structured prompt engineering.
- Developed **RESTful endpoints and a responsive UI** with tone/length controls, regeneration, and copy functionality for seamless email generation without database storage.

EDUCATION

Bachelor of Technology (B.Tech) in Electronics and Communication Engineering

Guru Tegh Bahadur Institute of Technology, GGSIPU • New Delhi, India • 2025 • **CGPA: 8.9**

Ryan International School • Faridabad • CBSE • **X: 90.33% • XII: 95.2%**
